

IN THE DRAWINGS:

Submitted herewith are replacement sheets of drawing for Figs. 1A-1B and 2A-2B which have been corrected to add the transparent insulating film 10 as discussed more fully in the Remarks section.

REMARKS

In the previously filed response, independent claim 1 was amended to recite a transparent insulating film, and new independent claim 15 also recites a transparent insulating film. The original specification describes, for example, on pages 13 and 14, provision of a transparent insulating film. More specifically, with respect to the Fig. 1 embodiment, the original specification describes that a transparent insulating film may be formed between the colored layer and the reflective film and with respect to the Fig. 2 embodiment, the original specification describes that a transparent insulating film may be formed on the planarizing film 5 with the reflective film 4 being formed thereon. Since the claims recite the transparent insulating film, the drawings have been amended to illustrate this film, which has been labeled with reference numeral 10, and the specification has been correspondingly amended to refer to the transparent insulating film by means of reference numeral 10. The amendments made to the specification and drawings find clear support in the original disclosure and do not introduce prohibited new matter into the disclosure.

In addition, claim 7 has been amended for clarity and, as amended, recites that the reflective film is formed on the transparent insulating film (rather than on the planarizing film) as shown in corrected Fig. 2A, which shows

the reflective film 5 formed on the transparent insulating film 10.

In view of the foregoing, and for the reasons set forth in the previous response, the application is now believed to be in allowable form. Accordingly, favorable reconsideration and passage of the application to issue are respectfully requested.

Respectfully submitted,
